Elevate Your Space with Stellar Marble & Quartz.

Enhance your space with the timeless elegance of Marble and Quartz. Designed for luxury and durability, these exquisite surfaces bring a refined aesthetic to any setting. Available in sizes 1650x3250mm and 1500x3100mm, with thickness options of 30mm, 20mm, and 15mm, they offer the perfect fit for both indoor and outdoor applications. Elevate your interiors with the sophisticated charm. where beauty meets strength to create a truly magnificent ambiance.

AVAILABLE THICKNESS

Technology On Top

The technology of quartz stone involves engineering natural quartz crystals with resins and pigments to create durable, non-porous surfaces. Quartz slabs are manufactured through a process of mixing, compressing, and curing under heat and pressure, resulting in a strong, scratch-resistant material.

Cleaning quartz stone is easy and requires minimal effort. Simply wipe the surface with a soft cloth and mild soap mixed with warm water. Avoid harsh chemicals, abrasive pads, and strong acids to prevent damage. For tough stains, use a non-abrasive cleaner or a mixture of baking soda and water. Regular cleaning keeps quartz looking shiny and new.

- EASY TO CLEAN
- CHEMICAL RESISTANT
- SCRATCH RESISTANT
- FROST RESUSTANT
- STAIN RESISTANT

Application area

Quartz stone is widely used in interior and exterior applications due to its durability, aesthetic appeal, and low maintenance. It is commonly used for kitchen countertops, bathroom vanities, flooring, wall cladding, and staircases. In commercial spaces, it is preferred for reception desks, tabletops, and decorative panels.

ROOM

Edge profile

Your surface is not complete without an edge profile to complement your slab selection and space.

With keros stone, selecting the best fit is easy.

The unique properties and durability of quartz surfaces allow for a wide range of edge profile design options.

Many edge profiles are possible, from a standard edge to laminated or mitered edges which create the appearance of a thicker slab.

All edge details should have a minimum 1/8" radius on anyprofile, for both top and bottom edges.
